

Sintered Pads

COFREN SP 134/201

Description

Brake pads in sintered material for brakes using steel discs.
Specially designed for trains with speed up to 200 km/h.

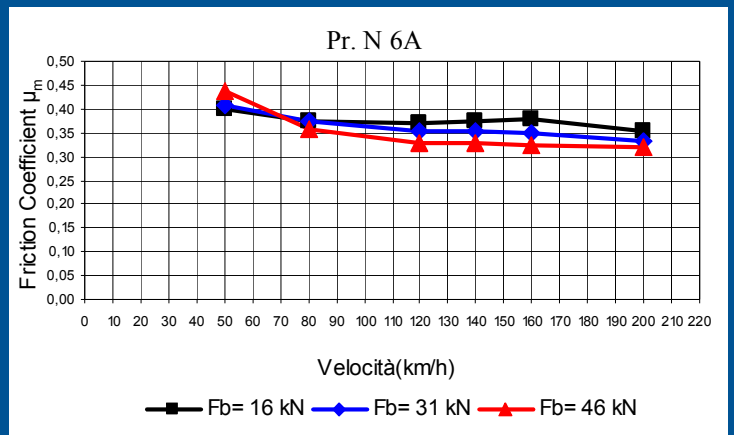

Physical and tribological characteristics

Density : 5.20 ÷ 5.50 gr/cm³
Hardness: 90 HRR ± 20 %
Melting temperature: > 1000 ° C

UIC HOMOLOGATED

Friction characteristics

According to fiche UIC 541-3, Test Program Nr. 6A e Nr. 6B

Main applications

Developed for those applications in which it develops a considerable energy during the braking, as Intercity, locomotives and bi-levels trains (TAF)
